LIST OF CONTENTS

VOLUME 34

NUMBER 1

J. E. McFarlane and I. Alli — 1 Nutritional studies on the group effect in *Acheta domesticus* (L.)

Douglas J. Schmidt and John C. Reese — 5 The effects of physiological stress on black cutworm (*Agrotis ipsilon*) larval growth and food utilization

T. S. Adams and P. A. Filipi — 11 Interaction between juvenile hormone, 20-hydroxyecdysone, the corpus cardiacum–allatum complex, and the ovaries in regulating vitellogenin levels in the housefly, *Musca domestica*

A. M. Angioy — 21 Reflex cardiac response to a feeding stimulus in the blowfly *Calliphora vomitoria* L.

Howard W. Fescemyer and Abner M. Hammond — 29 The relationship between population density, juvenile hormone, juvenile hormone esterase and phase variation in larvae of the migrant insect, *Anticarsia gemmatalis* Hübner

Driss Radallah and Bernard Fournier — 37 Ecdysteroids and cuticulogeneses in partial embryonic systems following microsurgery on eggs of *Carausius morosus*

S. G. S. Gunnarsson — 47 Effects *in vivo* of β-1,3-glucans from fungal cell walls on the circulating haemocytes of the desert locust *Schistocerca gregaria*

J. E. L. Butterfield and J. C. Coulson — 53 The rate of development in the overwintering eggs of *Tipula pagana* Meigen

E. Stumm-Zollinger and P. S. Chen — 59 Gene expression in male accessory glands of interspecific hybrids of *Drosophila*

Naoji Fujishiro and Hiromasa Kijima — 75 Difference in median acceptance threshold of proboscis-extension reflex between male and female in *Drosophila melanogaster*

P. D. Cooper, G. G. E. Scudder and G. A. Quamme — 79 Changes in fluid and ion secretion following stimulation in isolated Malpighian tubules of the water boatman, *Cenocorixa blaisdelli* (Hung.) [Hempitera, Corixidae]

NUMBER 2

Karl Crailsheim — 85 Regulation of food passage in the intestine of the honeybee (*Apis mellifera* L.)

John H. Postlethwait, Stephen H. Saul and Juanita A. Postlethwait — 91 The antibacterial immune response of the medfly, *Ceratitis capitata*

Catherine Loudon — 97 Development of *Tenebrio molitor* in low oxygen levels

H. Komnick — 105 Intestinal absorption of defined lipids by the larval dragonfly *Aeshna cyanea* (Insecta: Odonata): mono- and polyunsaturated free fatty acids and their homotriglycerides

Paul G. Fields and Jeremy N. McNeil — 111 Characteristics of the larval diapause in *Ctenucha virginica* (Lepidoptera: Arctiidae)

E. R. RUMBO 117 Cross- and self-adaptation of electroantennogram responses in the lightbrown apple moth (*Epiphyas postvittana*)

PETER H. SMITH, LINDSAY BARTON BROWNE and A. C. M. VAN GERWEN 125 Sperm storage and utilisation and egg fertility in the sheep blowfly, *Lucilia cuprina*

JANICE READIO, KENNETH PECK, ROGER MEOLA and KARL H. DAHM 131 Corpus allatum activity (*in vitro*) in female *Culex pipiens* during adult life cycle

A. RUKNUDIN and V. VEERA RAGHAVAN 137 Initiation, maintenance and energy metabolism of sperm motility in the bed bug, *Cimex hemipterus*

R. ZIEGLER, R. HOFF and M. ROHDE 143 Storage site of glycogen phosphorylase activating hormone in larvae of *Manduca sexta*

ANNOUNCEMENT i

NUMBER 3

HOST FINDING AND FEEDING IN ADULT PHYTOPHAGOUS INSECTS

SONNY B. RAMASWAMY v Introduction

ELAINE A. BACKUS 151 Sensory systems and behaviours which mediate hemipteran plant-feeding: a taxonomic overview

R. F. CHAPMAN 167 Sensory aspects of host-plant recognition by Acridoidea: questions associated with the multiplicity of receptors and variability of response

P. G. FENEMORF 175 Host-plant location and selection by adult potato moth, *Phthorimaea operculella* (Lepidoptera: Gelechiidae): a review

M. O. HARRIS and J. R. MILLER 179 Host-acceptance behaviour in an herbivorous fly, *Delia antiqua*

MAKOTO HATTORI 191 Host-plant factors responsible for oviposition behaviour in the limabean pod borer, *Etiella zinckenella* Treitschke

ARY A. HOFFMANN 197 Early adult experience in *Drosophila melanogaster*

HIROSHI HONDA, TAKAO ISHIWATARI and YOSHIHARU MATSUMOTO 205 Fungal volatiles as oviposition attractants for the yellow peach moth, *Conogethes punctiferalis* (Guenée) (Lepidoptera: Pyralidae)

B. K. MITCHELL 213 Adult leaf beetles as models for exploring the chemical basis of host-plant recognition

S. F. NOTTINGHAM 227 Host-plant finding for oviposition by adult cabbage root fly, *Delia radicum*

SONNY B. RAMASWAMY 235 Host finding by moths: sensory modalities and behaviours

J. A. A. RENWICK and CELIA D. RADKE 251 Sensory cues in host selection for oviposition by the cabbage butterfly, *Pieris rapae*

J. H. VISSER 259 Host-plant finding by insects: orientation, sensory input and search patterns

NUMBER 4

PAUL G. FIELDS and JEREMY N. MCNEIL 269 The cold-hardiness of *Ctenucha virginica* (Lepidoptera: Arctiidae) larvae, a freezing-tolerant species

E. MCCLAIN, P. MAGNUSON and S. J. WARNER 279 Behavioural fever in a Namib Desert tenebrionid beetle, *Onymacris plana*

Y. M. VAN HOUTEN, W. P. J. OVERMEER, A. Q. VAN ZON and A. VEERMAN 285 Thermoperiodic induction of diapause in the predacious mite, *Amblyseius potentillae*

ROBERT KALMES and DANIELLE ROJAS-ROUSSE 291 Energy losses as a function of temperature during the development of *Diadromus collaris* and *D. pulchellus*, solitary endoparasites of *Acrolepiopsis assectella* (Lepidoptera: Plutellidae)

JAN A. VEENSTRA 299 Effects of 5-hydroxytryptamine on the Malpighian tubules of *Aedes aegypti*

THOMAS G. WILSON and JERRY THURSTON 305 Genetic variation for methoprene resistance in *Drosophila melanogaster*

BERNARD FOURNIER and JOSIANE GIRARDIE 309 A new function for the locust neuroparsins: stimulation of water reabsorption

SANDRA A. ALLAN, JAMES S. PHILLIPS, DEMAR TAYLOR and DANIEL E. SONENSHINE 315 Genital sex pheromones of ixodid ticks: evidence for the role of fatty acids from the anterior reproductive tract in mating of *Dermacentor variabilis* and *Dermacentor andersoni*

RAN ARIELI and CARMEL LEHRER 325 Recording of locust breathing frequency by barometric method exemplified by hypoxic exposure

R. F. CHAPMAN 329 Variations in the size of the midgut caeca during the fifth instar of the grasshopper, *Schistocerca americana* (Drury)

JAYNE L. BROOKMAN, NORMAN A. RATCLIFFE and ANDREW F. ROWLEY 337 Optimization of a monolayer phagocytosis assay and its application for studying the role of the prophenoloxidase system in the wax moth, *Galleria mellonella*

MARIE-CLAIRE CAMMAERTS, ATHULA B. ATTYGALLE, OTTO VOSTROWSKY and HANS-JÜRGEN BESTMANN 347 Ethological studies of the mandibular gland secretion of the ant *Manica rubida* (Formicidae: Myrmicinae)

NUMBER 5

i Editorial Announcement

PAUL J. LINDSAY and W. REUBEN KAUFMAN 351 Action of some steroids on salivary gland degeneration in the ixodid tick, *A. americanum* L.

JOHN R. B. LIGHTON 361 Simultaneous measurement of oxygen uptake and carbon dioxide emission during discontinuous ventilation in the tok-tok beetle, *Psammodes striatus*

DAVID B. HERBST and TIMOTHY J. BRADLEY 369 Osmoregulation in dolichopodid larvae (*Hydrophorus plumbeus*) from a saline lake

MAKOTO HATAKOSHI, ISAMU NAKAYAMA and LYNN M. RIDDIFORD 373 The induction of an imperfect supernumerary larval moult by juvenile hormone analogues in *Manduca sexta*

ANGELA B. LANGE, IAN ORCHARD and F. MICHAEL BARRETT 379 The presence and distribution of proctolin in the blood-feeding bug, *Rhodnius prolixus*

H. A. v. d. Woude and H. A. Verhoef 387 Reproductive diapause and cold hardiness in temperate Collembola *Orchesella cincta* and *Tomocerus minor*

Takashi Okuda and Yasuo Chinzei 393 Vitellogenesis in a lady-beetle, *Coccinella septempunctata* in relation to the aestivation–diapause

A. E. Douglas 403 On the source of sterols in the green peach aphid, *Myzus persicae*, reared on holidic diets

L. J. Cookson 409 The site and mechanism of ^{14}C-lignin degradation by *Nasutitermes exitiosus*

Krishnappa Venkatesh and R. Michael Roe 415 The role of juvenile hormone and brain factor(s) in the regulation of plasma juvenile hormone esterase activity during the last larval stadium of the tobacco hornworm, *Manduca sexta*

Jürgen J. Milde 427 Visual responses of interneurones in the posterior median protocerebrum and the central complex of the honeybee *Apis mellifera*

Book Reviews 437

NUMBER 6

Paul J. Lindsay and W. Reuben Kaufman 439 The efficacy of azadirachtin on putative ecdysteroid-sensitive systems in the ixodid tick *Amblyomma americanum* L.

Edward E. Davis 443 Structure–response relationship of the lactic acid-excited neurones in the antennal grooved-peg sensilla of the mosquito *Aedes aegypti*

J. F. Dale and S. S. Tobe 451 The effect of a calcium ionophore, a calcium channel blocker and calcium-free medium on juvenile hormone release *in vitro* from corpora allata of *Locusta migratoria*

X. Bellés, F. Camps, J. Casas, A. Messeguer and M. D. Piulachs 457 *In vitro* inhibition of juvenile hormone III biosynthesis by precocene II and 3,4-dihydroprecocene II on *Blattella germanica*

Walter R. Terra, F. P. Espinoza-Fuentes, Alberto F. Ribeiro and Clélia Ferreira 463 The larval midgut of the housefly (*Musca domestica*): ultrastructure, fluid fluxes and ion secretion in relation to the organization of digestion

Ruth Berg, Imke Schuchmann-Feddersen and Otto Schmidt 473 Bacterial infection induces a moth (*Ephestia kuhniella*) protein which has antigenic similarity to virus-like particle proteins of a parasitoid wasp (*Venturia canescens*)

Michel Renou, Bernard Lalanne-Cassou, Jean-Christophe Doré and Marie-Louise Milat 481 Electroantennographic analysis of sex pheromone specificity in neotropical Catocalinae (Lepidoptera: Noctuidae): a multivariate approach

Anthony J. Zera and Kristina C. Tiebel 489 Brachypterizing effect of group rearing, juvenile hormone III and methoprene in the wing-dimorphic cricket, *Gryllus rubens*

Michael J. O'Donnell and Bhaktraj Singh 499 Cyclic AMP modulates electrical excitability of insect oöcytes (*Rhodnius prolixus*)

C. A. Knobloch and C. G. H. Steel 507 Interactions between limb regeneration and ecdysteroid titres in last larval instar *Rhodnius prolixus* (Hemiptera)

Michael M. Martin and Heidi M. Van't Hof 515 The cause of reduced growth of *Manduca sexta* larvae on a low-water diet: increased metabolic processing costs or nutrient limitation?

J. M. Giebultowicz, R. A. Bell and R. B. Imberski — 527 Circadian rhythm of sperm movement in the male reproductive tract of the gypsy moth, *Lymantria dispar*

J. C. Pendland, M. A. Heath and D. G. Boucias — 533 Function of a galactose-binding lectin from *Spodoptera exigua* larval haemolymph: opsonization of blastospores from entomogenous hyphomycetes

Helmut Kindle, Rolf König and Beatrice Lanzrein — 541 *In vitro* uptake of vitellogenin by follicles of the cockroach *Nauphoeta cinerea*: comparison of artificial media with haemolymph media and role of vitellogenin concentration and of juvenile hormone

NUMBER 7

ECDYSONE: FROM BIOSYNTHESIS TO MODE OF ACTION

J. Koolman — v Foreword

Jules A. Hoffman — 549 Peter Karlson

Fabienne Lachaise, Michelle Hubert, Simon G. Webster and René Lafont — 557 Effect of moult-inhibiting hormone on ketodiol conversion by crab Y-organs

G. Käuser, H. M. Brandtner, H.-J. Bidmon and J. Koolman — 563 Ecdysone synthesis and release by the brain–ring gland complex of blowfly larvae

J. T. Warren, S. Sakurai, D. B. Rountree and L. I. Gilbert — 571 Synthesis and secretion of ecdysteroids by the prothoracic glands of *Manduca sexta*

Peter Verhaert and Arnold De Loof — 577 Human luteinizing hormone-like material in the neurosecretory system of *Periplaneta americana*: a histochemical study with monoclonal antibodies

Nancy A. Memmel and A. Krishna Kumaran — 585 Role of ecdysteroids and juvenile hormone in regulation of larval haemolymph protein gene expression in *Galleria mellonella*

Michael Ma, Jiang-Zhong Zhang, He Gong and Robert Gwadz — 593 Permissive action of juvenile hormone on vitellogenin production by the mosquito *Aedes aegypti*

H. R. Walgraeve, G. R. Criel, P. Sorgeloos and A. P. De Leenheer — 597 Determination of ecdysteroids during the moult cycle of adult *Artemia*

Pauline O. Lawrence — 603 Ecdysteroid titres and integument changes in superparasitized puparia of *Anastrepha suspensa* (Diptera: Tephritidae)

F. Sehnal, A. Fonágy, H. Akai and H. G. Kallenborn — 609 Prothoracic glands and ecdysteroid titre in *Galleria mellonella* larvae

H. Laufer, D. W. Borst, T. A. Foley and M. Landau — 615 Ecdysteroid titres in vitellogenic *Libinia emarginata*

J. P. Delbecque, J. L. Connat and R. Lafont — 619 Polar and apolar metabolites of ecdysteroids during the metamorphosis of *Tenebrio molitor*

P. Whiting and L. Dinan — 625 The occurrence of apolar ecdysteroid conjugates in newly-laid eggs of the house cricket, *Acheta domesticus*

Peter Maróy, Gabrielle Kaufmann and Andreas Dübendorfer — 633 Embryonic ecdysteroids of *Drosophila melanogaster*

Jean-Louis Connat and Ellen Marie Dotson — 639 Comparative investigation of the egg ecdysteroids of ticks using radioimmunoassay and metabolic studies

N. Hoggard and H. H. Rees — 647 Reversible activation–inactivation of mitochondrial ecdysone 20-mono-oxygenase: a possible role for phosphorylation–dephosphorylation

Eli Shaaya and Lynn M. Riddiford — 655 Depressed RNA synthesis in the early stages of the larval–pupal transformation of Lepidoptera: the role of 20-hydroxyecdysone

Samuel Galewsky, Julie K. Hope and Wayne L. Rickoll — 661 The effects of monensin on 20-hydroxyecdysone-induced glycoprotein secretion and aggregation in *Drosophila* S3 cells

Pierre Cassier, Denise Baghdassarian-Chalaye, Nicole de Besse, Marguerite Papillon, Luis Baldaia and Patrick Porcheron — 669 Ecdysteroids and activation of epidermal cells in the locust, *Locusta migratoria*

Clément Mettling, Angela Giangrande and Geoff Richards — 679 The use of oligonucleotide probes in studies of insect gene activity in development

Marta Izquierdo, Joan Galceran, Javier Sampedro and Javier Llanos — 685 The role of 2B5 in the control of gene activity by ecdysone in *Drosophila*

M. Martin and B. Jarry — 691 Expression of transfected genes in a *Drosophila* cell line in transient assay and stable transformation

J. P. Girault and R. Lafont — 701 The complete ^{1}H-NMR assignment of ecdysone and 20-hydroxyecdysone

I. D. Wilson, E. D. Morgan, P. Robinson, R. Lafont and C. Blais — 707 A comparison of radio-thin-layer and radio-high-performance liquid chromatography for ecdysteroid metabolism studies

H. Schmutterer — 713 Potential of azadirachtin-containing pesticides for integrated pest control in developing and industrialized countries

W. Reuben Kaufman — 721 The effects of steroids and azadirachtin on the salivary gland and ovary in ixodid ticks

M. Malczewska, D. B. Gelman and B. Cymborowski — 725 Effect of azadirachtin on development, juvenile hormone and ecdysteroid titres in chilled *Galleria mellonella* larvae

Dale B. Gelman, Charles W. Woods and Alexej B. Borkovec — 733 Effects of ecdysone and 20-hydroxyecdysone on apyrene spermiogenesis in the European corn borer, *Ostrinia nubilalis*

G. Käuser — 739 Some statistical comments on Ecdysone Workshops

I Announcement

NUMBER 8

John Brady — 743 Circadian ontogeny in the tsetse fly: a permanent major phase change after the first feed

Masayuki Morita, Makoto Hatakoshi and Sumio Tojo — 751 Hormonal control of cuticular melanization in the common cutworm, *Spodoptera litura*

J. P. Woodring, Ouida Williams Meier and Randy Rose — 759 Effect of development, photoperiod, and stress on octopamine levels in the house cricket, *Acheta domesticus*

Christopher J. Pio and John G. Baust — 767 Effects of temperature cycling on cryoprotectant profiles in the goldenrod gall fly, *Eurosta solidaginis* (Fitch)

E. M. Hegazi, A. Schopf, E. Fuhrer and S. H. Fouad — 773 Developmental synchrony between *Spodoptera littoralis* (Boisd.) and its parasite *Microplitis rufiventris* Kok.

R. H. Dadd and J. E. Kleinjan — 779 Prostaglandin sparing of dietary arachidonic acid in the mosquito *Culex pipiens*

Maurice Charlet, Jean-Pierre Roussel, Elisabeth Rinternecht, Jean-Pierre Berchtold and Marie-France Costet — 787 Developmental and morphogenetic alterations in larvae of *Locusta migratoria* reared on plant diet with a selectively modified sterol profile

A. Turberg, M. Spindler-Barth, B. Lutz, M. Lezzi and K.-D. Spindler — 797 Presence of an ecdysteroid-specific binding protein ("receptor") in epithelial tissue culture cells of *Chironomus tentans*

M. F. Bowen, E. E. Davis and D. A. Haggart — 805 A behavioural and sensory analysis of host-seeking behaviour in the diapausing mosquito *Culex pipiens*

Tom Pannabecker and Ian Orchard — 815 Receptors for octopamine in the storage lobe of the locust (*Locusta migratoria*) corpus cardiacum: evidence from studies on cyclic nucleotides

Sara Trevitt, Kevin Fowler and Linda Partridge — 821 An effect of egg-deposition on the subsequent fertility and remating frequency of female *Drosophila melanogaster*

NUMBER 9

R. Brent Thomson, Janet D. Speight and John E. Phillips — 829 Rectal acid secretion in the desert locust, *Schistocerca gregaria*

Karl Crailsheim — 839 Intestinal transport of sugars in the honeybee (*Apis mellifera* L.)

Sally C. Cox — 847 The action of chlordimeform and demethylchlordimeform on the octopamine-sensitive proleg retractor muscle of *Antheraea* larvae

Kenneth G. Konz, Charles R. Paulson and Barbara Stay — 857 Ecdysteroid titres and head critical period for moulting in male larvae of the cockroach, *Diploptera punctata*

David Scott and Larry L. Jackson — 863 Interstrain comparison of male-predominant antiaphrodisiacs in *Drosophila melanogaster*

Ian Orchard, Angela B. Lange and F. Michael Barrett — 873 Serotonergic supply to the epidermis of *Rhodnius prolixus*: evidence for serotonin as the plasticising factor

Isabel Bermudez and David J. Beadle — 881 Electrophysiological and ultrastructural properties of cockroach (*Periplaneta americana*) myosacs

Margaret Hogan, Pamela C. Veivers, M. Slaytor and R. T. Czolij — 891 The site of cellulose breakdown in higher termites (*Nasutitermes walkeri* and *Nasutitermes exitiosus*)

Book Review — 901

NUMBER 10

David B. Herbst, Frank P. Conte and Victor J. Brookes — 903 Osmoregulation in an alkaline salt lake insect, *Ephydra* (*Hydropyrus*) *hians* Say (Diptera: Ephydridae) in relation to water chemistry

S. G. Naidu and J. Hattingh — 911 Water balance and osmoregulation in *Physadesmia globosa*, a diurnal tenebrionid beetle from the Namib desert

J. P. Proux, M. Picquot, J.-P. Herault and B. Fournier — 919 Diuretic activity of a newly identified neuropeptide—the arginine-vasopressin-like insect diuretic hormone: use of an improved bioassay

Stanley D. Beck — 929 Resonance in photoperiodic regulation of larval diapause in *Ostrinia nubilalis*

R. W. Cohen, S. Friedman and G. P. Waldbauer — 935 Physiological control of nutrient self-selection in *Heliothis zea* larvae: the role of serotonin

Walter E. Bollenbacher — 941 The interendocrine regulation of larval–pupal development in the tobacco hornworm, *Manduca sexta*: a model

M. J. Lehane — 949 Evidence for secretion by the release of cytoplasmic extrusions from midgut cells of *Stomoxys calcitrans*

W. G. Friend, J. M. Schmidt, J. J. B. Smith and R. J. Tanner — 955 The effect of sugars on ingestion and diet destination in *Culiseta inornata*

P. Baldrick, D. Hyde and J. H. Anstee — 963 Microelectrode studies on Malpighian tubule cells of *Locusta migratoria*: effects of external ions and inhibitors

Ginette Lauge, Claude Huet, Michel Huet and Jacques Pradel — 977 Relationship between sexual phenotype and vitellogenins in 2X.3A intersexes of *Drosophila melanogaster*

NUMBER 11

V. Benno Meyer-Rochow and Nobuo Gokan — 983 Functional aspects and eye organization of black and white morphs of the New Zealand beach beetle *Chaerodes trachyscelides* (Tenebrionidae)

J. I. Moss and T. A. Miller — 997 A pharmacological study of the hyperneural muscle of *Periplaneta americana*

K. V. Singarajah — 1005 Spectral sensitivity of motion-sensitive units of the butterfly ventral nerve cord

Michael Friedländer and Stuart E. Reynolds — 1013 Meiotic metaphases are induced by 20-hydroxyecdysone during spermatogenesis of the tobacco hornworm, *Manduca sexta*

J. L. Graves, L. S. Luckinbill and A. Nichols — 1021 Flight duration and wing beat frequency in long- and short-lived *Drosophila melanogaster*

Z. Peng and P. W. Miles — 1027 Studies on the salivary physiology of plant bugs: function of the catechol oxidase of the rose aphid

Grzegorz Rosiński and Gerd Gäde — 1035 Hyperglycaemic and myoactive factors in the corpora cardiaca of the mealworm, *Tenebrio molitor*

A. E. Douglas — 1043 Experimental studies on the mycetome symbiosis in the leafhopper *Euscelis incisus*

G. E. Spates, J. R. DeLoach and A. C. Chen — 1055 Ingestion, utilization and excretion of blood meal sterols by the stable fly, *Stomoxys calcitrans*

A. Veerman, M. Beekman and R. L. Veenendaal — 1063 Photoperiodic induction of diapause in the large white butterfly, *Pieris brassicae*: evidence for hourglass time measurement

NUMBER 12

Janice Clymer Cavin and Timothy J. Bradley	1071	Adaptation to ingestion of β-carboline alkaloids by Heliconiini butterflies
Brad Stiles, Roger S. Bradley, Gwendy S. Stuart and Kenneth D. Hapner	1077	Site of synthesis of the haemolymph agglutinin of *Melanoplus differentialis* (Acrididae: Orthoptera)
Roberto Crnjar, Anna Maria Angioy, Pierangelo Pietra, Chih-Ming Yin, Anna Liscia, and Iole Tomassini Barbarossa	1087	Control mechanisms of calling behaviour in *Lymantria dispar*: an electrophysiological investigation on the role of the terminal abdominal ganglion
Karl Crailsheim	1093	Transportof leucine in the alimentary canal of the honeybee (*Apis mellifera* L.) and its dependence on season
Grzegorz Rakowski	1101	Effect of illumination intensity on the response of the hide beetle, *Dermestes maculatus*, to aggregation pheromone
T. S. Adams, Thomas J. Kelly and Charles W. Woods	1105	Relationship between the corpus cardiacum–allatum complex and ovaries with the haemolymph ecdysteroid profile in the housefly, *Musca domestica*
Roxanne M. Broadway and Sean S. Duffey	1111	The effect of plant protein quality on insect digestive physiology and the toxicity of plant proteinase inhibitors
A. J. Slinger and R. E. Isaac	1119	Ecdysteroid titres during embryogenesis of the cockroach, *Periplaneta americana*
Sanford D. Porter	1127	Impact of temperature on colony growth and developmental rates of the ant, *Solenopsis invicta*
Seiji Tanaka, David L. Denlinger and Henk Wolda	1135	Seasonal changes in the photoperiodic response regulating diapause in a tropical beetle, *Stenotarsus rotundus*
Book Reviews	1143
